

FLAME DANCER **ABSTRACTS**

a new generation in heating

infiniti **fires**

FLAME DANCER™ ABSTRACTS

A range of flue-less gas fires developed by Infiniti Fires using their high tech Flamer Dancer grate.

The Flame Dancer grates are designed to give both stunning visual appeal as well as very low emissions, very important in a flue-less gas appliance.

These industry leading low emissions are very beneficial in terms of:

- a virtually odourless grate
- a very safe grate with lower amounts of Carbon Monoxide/Dioxide produced
- a more efficient grate as more of the carbon in the fossil fuel is converted in the combustion process to useable heat.

Flame Dancer Abstract units are available with heating capacities of 200m³ or 300m³. The FD 200 unit is ideal for those smaller rooms from 60m³ upwards and the FD300 unit from 98m³ upwards.

Please specify the heating capacity required when ordering.

The bodies of these gas fires were designed to be different to the norm currently produced in South Africa. With innovative thinking about minimising steel waste and maximising look and heating capacity.

In line with the great abstract architects and painters of the last century who dared to be different, these units are designed to be both functional and aesthetically pleasing in a minimalist way. We have named our units after some of these great achievers.

Corbusier

The single and double sided Corbusier have a space saving 310mm depth, making them very easy to build into internal brick walls, whilst giving a very stylish appearance.

Picasso

The wall mounted Picasso unit, with its sleek contours, makes this a feature to be fitted onto a wall at the same height as a picture.

Designed to be retro-fitted after a wall is complete, by simply bolting it to the wall and connecting it to a gas supply. Ideal as a powerful heater in existing homes or newly built houses.

Cezanne

The single and double sided Cezanne units, designed to be freestanding units. An easy retro fit in existing homes.

Flame Dancer Grates are available in the following fuel effects:

Burner uncovered

- Black Steel
- White or black stone chips around the burner
- Natural White Stones around the burner

Burner Covered

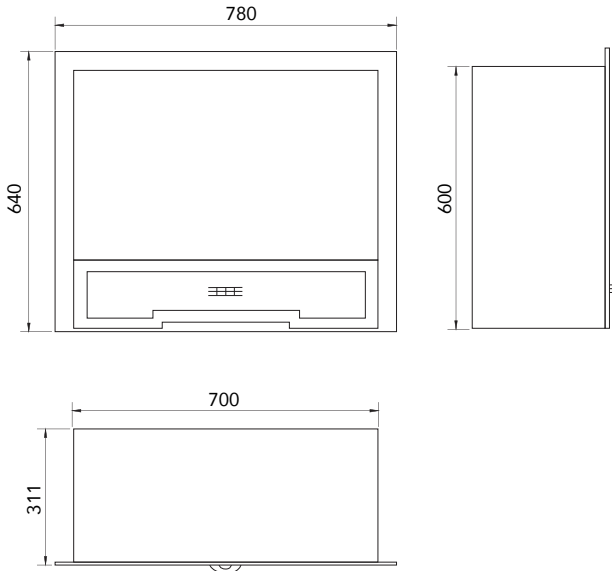

- White or black stone chips around the burner with natural white stones over the burner
- Natural white stones around and over the burner.

The Picasso unit is supplied with a loose stone trim. This may be fitted if desired to retain any of the above coverings over the top of the unit.

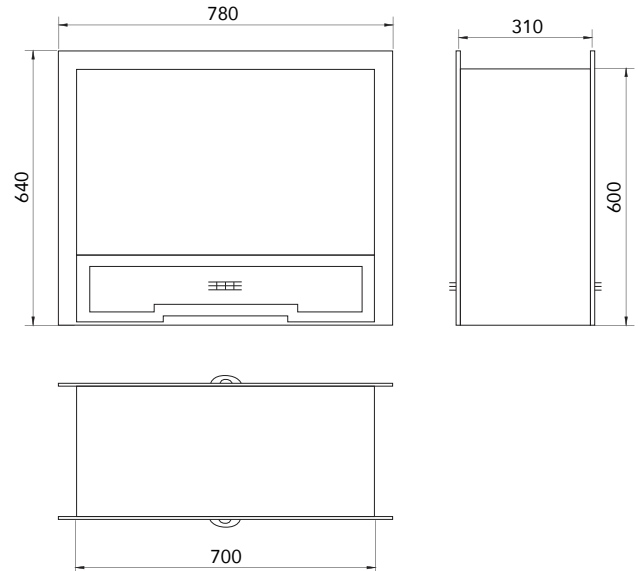

Double Sided Cezanne

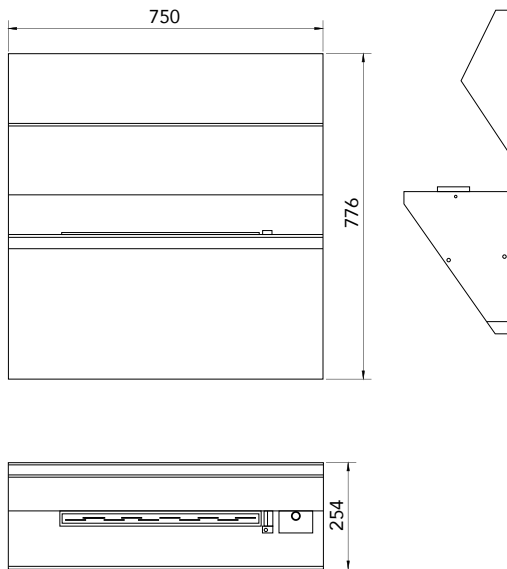

CORBUSIER SINGLE SIDED

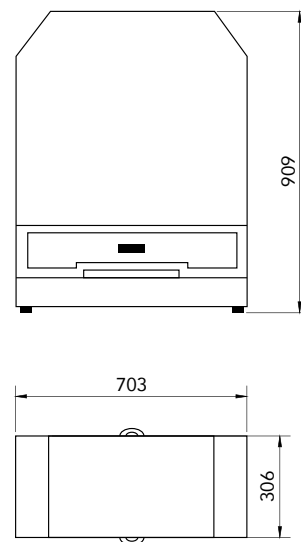

CORBUSIER DOUBLE SIDED

PICASSO

CEZANNE SINGLE/DOUBLE SIDED

UNIT	Heat Output	Heating Capacity	Gas Consumption		Legal Minimum Room Size	Cross Ventilation Required *
			g/hr			
	Kw	m³	Lo	Hi	m³	cm²
Flame Dancer 200 Grate	5 Kw	200	150	300	60	2 x 98
Flame Dancer 300 Grate	7 Kw	300	250	490	98	2x 160

* Cross Ventilation is required if your room is smaller than the legal requirement.

Warranty

- 15 Year warranty on built in fireboxes
- 5 Year warranty on wood stoves
- 2 Year warranty on gas grates
